PROFESSIONAL SUMMARY

Frontend Developer with 4.7+ years of experience building secure, scalable, and high-performance web and mobile applications using React.js, React Native, TypeScript, and Redux. Proven track record in government and fintech platforms with expertise in frontend architecture, REST API integration, responsive design, role-based access control, performance optimization, unit testing, and CI/CD workflows. Skilled in prompt engineering and LLM-integrated application development. Strong collaborator in Agile (Scrum) environments with experience in cross-browser compatibility, WCAG accessibility standards, and modern build tools.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, React Native, Redux, jQuery

Frontend & Styling: HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Responsive Design, WCAG Accessibility

APIs & Data: RESTful APIs, JSON, Axios, Fetch API, LLM Integration, Prompt Engineering

Databases: MongoDB, MySQL

Testing: Jest, React Testing Library, Cross-Browser Testing, Chrome DevTools

Auth & Security: Role-Based Access Control (RBAC), Protected Routes, OAuth 2.0, Secure UI Workflows

DevOps & Tools: Git, GitHub, VS Code, Webpack, Vite, CI/CD Pipelines, Jira, Agile (Scrum)

PROFESSIONAL EXPERIENCE

Agyom Private Limited

Feb 2026 – Apr 2026

Frontend Developer | Project: Yukti (Client: Kimbal)

Greater Noida

- Developed the Yukti survey management platform, a full-cycle utility survey web application supporting Feeder Survey, DT Survey, Consumer Survey, and Meter Installation workflows using React.js and TypeScript.
- Built a dynamic Role Management module with granular permission controls and a User Management system for assigning role-based access to field workers, admins, and supervisors across the platform.
- Developed a multi-level Work Order approval workflow with system-level auto-approval followed by L1, L2, and L3 manual approval stages, streamlining operational oversight.
- Contributed to the Yukti companion mobile application built with React Native (iOS and Android), integrated with an LLM using prompt engineering techniques for intelligent field data collection and survey assistance.
- Integrated RESTful APIs with robust error handling and loading states using Axios, and collaborated with backend and QA teams in Agile sprints using Jira.

Tata Consultancy Services (TCS)

Feb 2022 – Sep 2025

Frontend Developer | Client: Indian Air Force

Gurugram

- Worked onsite at Indian Air Force premises, ensuring secure handling of classified systems and direct stakeholder collaboration under stringent government security protocols.
- Migrated a legacy JSP-based application to a modern React.js and TypeScript frontend architecture, improving UI performance by 30% and long-term maintainability.
- Optimized application performance through Redux-based state management, component restructuring, and lazy loading, reducing initial load times by 25%.
- Improved UI performance through targeted component-level refactoring and memoization techniques (React.memo, useMemo), reducing page load times by 25%.
- Implemented responsive design and WCAG-compliant accessible UI components to ensure usability across devices and user groups.
- Collaborated with UI/UX designers using Figma to translate wireframes and mockups into pixel-perfect, responsive React components aligned with the design system.
- Wrote unit tests using Jest and React Testing Library to maintain code quality and prevent regressions across releases.
- Participated in code reviews, sprint planning, and retrospectives as part of an Agile Scrum team using Jira for task tracking.

Tata Consultancy Services (TCS)

Frontend Developer | Client: American Express

May 2021 – Feb 2022

Gurugram

- Developed a secure internal support dashboard using React.js to control execution of scheduled background jobs through intuitive UI workflows.
- Implemented role-based access control (RBAC) and protected routes using React Router to restrict sensitive job execution and ensure policy compliance.
- Built reusable React components with Material UI, reducing development time for new features by approximately 20%.
- Automated repetitive job management processes through a custom admin interface, improving operational efficiency by approximately 30%.
- Integrated RESTful APIs for real-time job status monitoring with error handling and retry logic.
- Collaborated with designers using Figma to translate mockups into pixel-perfect React components and ensured cross-browser compatibility across internal tools.

PROJECTS

E-Commerce Web Application

React.js, Redux, REST APIs, React Router

Live: ecommerce-frontend-r394.vercel.app | GitHub: github.com/vivek6448

- Developed a full-featured e-commerce frontend with product listings, detail views, cart management, and secure admin dashboard using React.js and Redux.
- Implemented role-based access control and protected routes to secure admin-only functionality, including background operation management.
- Integrated RESTful APIs with Axios for CRUD operations, including robust loading indicators and error-boundary handling.
- Optimized rendering performance using React.memo, useMemo, and conditional rendering, reducing unnecessary re-renders by 30%.
- Wrote unit tests with Jest and React Testing Library for critical components and utility functions.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology in Computer Science (GPA: 7.22)

2016 – 2020

Greater Noida
