PROFESSIONAL SUMMARY

Frontend Developer with 4.7+ years of experience designing and building secure, scalable, high-performance web and mobile applications using React.js, React Native, TypeScript, Redux, and JavaScript (ES6+). Proven track record delivering government and fintech platforms, with expertise in frontend architecture, RESTful API integration, responsive UI design, Role-Based Access Control (RBAC), performance optimization, unit testing, and CI/CD pipelines. Experienced in prompt engineering and LLM-integrated application development. Strong collaborator in Agile/Scrum environments with hands-on experience in cross-browser compatibility, WCAG 2.1 accessibility standards, and modern build tools (Webpack, Vite).

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, React Native, Redux, jQuery

Frontend & Styling: HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Responsive Design, WCAG Accessibility

APIs & Data: RESTful APIs, CRUD Operations, JSON, Axios, Fetch API, LLM Integration, Prompt Engineering

Databases: MongoDB, MySQL

Testing: Jest, React Testing Library, Cross-Browser Testing, Chrome DevTools

Auth & Security: Role-Based Access Control (RBAC), Protected Routes, OAuth 2.0, Secure UI Workflows

DevOps & Tools: Git, GitHub, VS Code, Webpack, Vite, CI/CD Pipelines, Jira, Agile (Scrum)

PROFESSIONAL EXPERIENCE

Agyom Private Limited

Feb 2026 - Apr 2026

Frontend Developer | Project: Yukti (Client: Kimbal)

Greater Noida

- Developed the Yukti survey management platform supporting Feeder, DT, Consumer Survey, and Meter Installation workflows using React.js, TypeScript, and Redux.
- Built Role Management with granular permissions and User Management with RBAC for field workers, admins, and supervisors. Integrated RESTful APIs for CRUD operations using Axios.
- Developed a multi-level Work Order approval workflow with system auto-approval followed by L1, L2, and L3 manual approval stages.
- Contributed to the Yukti React Native mobile app (iOS/Android) integrated with LLM using prompt engineering. Collaborated with designers using Figma and worked in Agile sprints with Jira.

Tata Consultancy Services (TCS)

Feb 2022 - Sep 2025

Frontend Developer | Client: Indian Air Force

Gurugram

- Worked onsite at Indian Air Force premises, ensuring secure handling of classified systems and direct stakeholder collaboration under stringent government security protocols.
- Migrated a legacy JSP-based application to a modern React.js and TypeScript frontend architecture with full CRUD functionality, improving UI performance by 30% and long-term maintainability.
- Optimized application performance through Redux-based state management, lazy loading, and memoization techniques (React.memo, useMemo), reducing page load times by 25%.
- Implemented RBAC and protected routes to secure classified modules, along with responsive design and WCAG-compliant accessible UI components across devices.
- Collaborated with UI/UX designers using Figma to translate wireframes and mockups into pixel-perfect, responsive React components aligned with the design system.
- Wrote unit tests using Jest and React Testing Library, participated in code reviews, sprint planning, and retrospectives in Agile Scrum using Jira.
- Configured Webpack for optimized production builds with code splitting, tree shaking, and asset compression, reducing overall bundle size by 40%.
- Built reusable component library with standardized props and documentation, enabling consistent UI patterns and accelerating feature development across the team.

Tata Consultancy Services (TCS)

May 2021 - Feb 2022

Frontend Developer | Client: American Express

Gurugram

- Developed a secure internal support dashboard using React.js with RBAC and protected routes via React Router to control scheduled background job execution and ensure policy compliance.
- Built reusable React components with Material UI, reducing development time by 20%. Automated job management processes, improving operational efficiency by 30%.
- Integrated RESTful APIs for CRUD operations and real-time job status monitoring with error handling and retry logic.
- Collaborated with designers using Figma to deliver pixel-perfect React components and ensured cross-browser compatibility across internal tools.
- Participated in Agile ceremonies including sprint planning, stand-ups, and retrospectives, coordinating closely with backend engineers to align on API contracts and delivery timelines.

PROJECTS

E-Commerce Web Application

React.js, Redux, REST APIs, React Router

Live: ecommerce-frontend-r394.vercel.app | GitHub: github.com/vivek6448

- Developed a full-featured e-commerce frontend with product listings, detail views, cart management, and secure admin dashboard using React.js and Redux.
- Implemented role-based access control and protected routes to secure admin-only functionality, including background operation management.
- Integrated RESTful APIs with Axios for CRUD operations, including robust loading indicators and error-boundary handling.
- Optimized rendering performance using React.memo, useMemo, and conditional rendering, reducing unnecessary re-renders by 30%.
- Wrote unit tests with Jest and React Testing Library for critical components and utility functions.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

2016 - 2020

Bachelor of Technology in Computer Science (GPA: 7.22) — Greater Noida
